Location

Management processes for sustainable development in territories
Workshop for Junior Researchers

Characterization

Beauty of the landscape and the natural, historical and cultural heritage.

The population has grown remarkably

Located in the floodplain of the Paraná River

Three local governments- between two important cities

Management processes for sustainable development in territories
Workshop for Junior Researchers

Premises

- Promote and value the natural and cultural heritage.
- Plan the land uses and activities in the territory.
- Adapt the government processes and politics.

Principal Conflicts

- The natural and cultural resources are not valued.
- The population grew in a disorganized way and its economic activities also.
- Environmental risks

Management processes for sustainable development in territories
Workshop for Junior Researchers

Management strategy

Sustainable tourism

Actions

Different projects with local actors and institutions

Meetings with local, regional and national government and institutions

Technical comitee University-governments

Trainings

Management processes for sustainable development in territories
Workshop for Junior Researchers

Conclusions

Results

Different projects with a positive impact in the site

Recognition of the area as a Microregion

People working in the territory following the strategy identified

- Aspects

Changes in government

There is no funding

So far, only economic resources from the University
