

Satellite School of the XI Neurotoxicity Society Meeting:

Basic and Translational Approaches to Study Nervous System Disorders

The program will include lectures, hands-on activities, and discussions aimed at graduate students interested in deepening their understanding of the biological basis of nervous system disorders and exploring how findings from basic research can be translated into clinical applications. The school will feature distinguished international speakers from various areas of neuroscience.

- ✓ Dates: October 19–21, 2026
- ✓ Venue: Inst. de Investigaciones Biológicas Clemente Estable, Montevideo, Uruguay
- ✓ Capacity: 15 students

- ✓ **APPLICATIONS:** until June 15, 2026, by submitting:

Curriculum Vitae (CV)
